The application has been amended as follows:

Claim 1, to correct spelling of the last limitation, add 'd' to standardize, "standardized".

Claim 16, to correct a 'antecedent basis' / 'indefinite' issue, amend to recite:

The method of claim 4, wherein [a] the script engine has a static constructor load [a] the script debug controller.

The following is an examiner's statement of reasons for allowance:

Bogle and other cited prior art, taken alone or in combination fail to disclose limitations as recited in independent claim 4:

“debugging a source code file which contains multiple nested languages; displaying each of the multiple nested languages in a debugging frame; editing each language in a debugging frame; and wherein the multi-language debugger used a standardized interface for a script engine and all communications with the script engine will be through calls to a script debug controller.”

Thus remaining dependent claims, claims 9-17, are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
